Jason Kryst

CLOUD SOLUTIONS ARCHITECT | TECHNICAL LEADER

Yorkville, IL 815-997-4015 jasonkryst@gmail.com linkedin.com/in/jasonkryst github.com/jasonkryst

PROFESSIONAL SUMMARY

Architecture-focused technology leader with 15+ years of experience designing cloud-native platforms, distributed systems, and enterprise-scale Azure solutions. Translates business strategy into scalable architecture, integration patterns, and technical roadmaps across complex product portfolios. Brings hands-on depth in Azure, microservices, APIs, documentation-as-code, CI/CD, and system design, with a track record of improving reliability, maintainability, and engineering execution through strong architectural governance and practical technical leadership.

CORE COMPETENCIES

- Enterprise Cloud Architecture
- Azure Cloud-Native Solution Design
- Microservices & Distributed Systems
- API Strategy & Integration Patterns
- Architecture Governance & Design Reviews
- Scalability, Reliability & Maintainability
- System Design, OOAD & Data Modeling
- Documentation-as-Code & Knowledge Architecture
- AI-Augmented Development & Tooling
- Engineering Team Leadership
- Stakeholder Alignment
- Executive Technical Communication

PROFESSIONAL EXPERIENCE

Lead Software Engineer (Technical Lead | Direct Reports)

10/2021 - Present

Ecolab, Naperville, Illinois

- Define and govern cloud solution architecture on Microsoft Azure, integrating REST APIs, Azure Service Bus, and microservices patterns with Azure Functions and Web Apps for Ecolab3D.
- Translate business and product objectives into technical architecture, system boundaries, and implementation roadmaps that align engineering teams around scalable, maintainable platform design.
- Lead 1–2 offshore engineering teams of ~10 engineers on a rotating annual basis — accountable for sprint facilitation, cross-team dependency management, 1:1s, performance reviews, compensation planning, and career pathing; leads cycle across teams each year to develop cross-domain technical breadth across Ecolab's enterprise portfolio.
- Executed a 2025 engineering excellence initiative producing a **5% velocity increase**, **41% defect reduction**, and **29% improvement in sprint continuity** — achieved through data-informed coaching, engineering metrics frameworks, and agile process redesign across teams.
- Architected and launched an enterprise documentation platform (DocFX) adopted by **745+ internal users** in 2025; established documentation-as-code standards and led the cross-functional team governing content strategy and ongoing maintenance.

Lead Application Developer

11/2018 - 10/2021

Farm Market iD, Westmont, Illinois

- Owned architecture, development, testing, and deployment for multi-industry SaaS platforms serving agricultural, insurance, and marketing sectors, including applications containing data on more than **2.4 million operators** and insights across **900 million acres** of U.S. farmland.

- Designed application features and system enhancements by translating leadership and product priorities into technical solutions, balancing scalability, maintainability, usability, and delivery speed.
- Designed and operationalized a formal CI/CD release management process from the ground up, improving deployment reliability, reducing production risk, and establishing repeatable release architecture across the platform.
- Authored internal IT governance policies covering software lifecycle, hardware procurement, and user access management, establishing foundational technical standards for a growing technology organization.

Adjunct Professor
01/2021 - Present

University of St. Francis, Joliet, Illinois

- Over five years, designed and delivered curriculum for Computer Science and Communication & Media Arts courses, developing hands-on, industry-aligned coursework that bridges academic theory with real-world engineering practice.
- Recognized for instructional excellence: rated **4.7/5.0** for overall teaching effectiveness (exceeding department and school averages) and **5.0/5.0** for learner respect.

Software Developer
05/2016 - 11/2018

Hands On Technology, Inc., Westmont, Illinois

- Developed and enhanced desktop electronic medical record software, contributing to architecture decisions, feature design, and long-term product stability for clinical workflows.
- Served as a Level 2 technical escalation resource, resolving complex system issues and contributing root cause analysis to improve reliability and maintainability.

EARLIER EXPERIENCE

Revenue Cycle Programmer Analyst **Presence Health, Bolingbrook, IL** 03/2015 - 04/2016

Designed and maintained custom applications for healthcare revenue cycle operations; established knowledge-sharing programs and introduced technology-driven process improvements.

Web Developer **Anttix, Shorewood, IL** 05/2011 - 03/2015

Engineered interactive web solutions for a diverse client portfolio using Drupal and CMS frameworks; managed client relationships, project delivery, and ongoing performance optimization.

SKILLS

Architecture & Design	Cloud Solution Architecture, Microservices, System Design, OOAD, Data Modeling, Database Design, API Design
Cloud & DevOps	Microsoft Azure, Azure Functions, Azure Service Bus, Azure DevOps, Azure OpenAI, CI/CD Pipelines, GitHub Copilot, Claude Code
Languages	C#, SQL/T-SQL, JavaScript
Tools & Platforms	Visual Studio, VS Code, DocFX, Git, GitHub Copilot, Claude Code
Technical Leadership	Architecture Governance, Technical Strategy, Roadmapping, Design Reviews, Stakeholder Communication, Agile/SCRUM Delivery

EDUCATION

North Central College , Naperville, Illinois
Master of Science in Management Information Systems, 2016

University of St. Francis , Joliet, Illinois
Bachelor of Science in Web Applications Development, 2012
Magna cum laude | Member, Delta Epsilon Sigma

CERTIFICATIONS

- Microsoft GitHub Copilot | Issued 09/2025, Expires 09/2027
- Microsoft Certified: Azure Fundamentals (AZ-900) | Issued 08/2023

In Progress

- Microsoft Certified: Azure Developer Associate (AZ-204) | Expected 2026
